TAKE CONTROL OF YOUR DOWNTIME.
TAKE CONTROL OF YOUR PREVENTATIVE MAINTENANCE.

With Morrison Container Handling Solution’s new Preventative Maintenance Agreements, you’re in the driver’s seat when it comes to unplanned downtime. Each agreement is designed to bring a Morrison Expert onsite for scheduled downtime and perform any maintenance on your system, preventing unplanned scenarios in the future and keeping you up and running effectively.

HOW IT WORKS

**STEP 1: Assess**
A Morrison Expert performs an initial assessment to recommend any additional parts and service needed while determining baseline improvements service will be measured against.

**STEP 2: Maintain**
Regular Preventative Maintenance = Efficiency. Your agreement will contain anywhere from 4 to 8 scheduled visits over the course of two years, all aimed at reducing unplanned downtime and lost production.

**STEP 3: Improve**
Improve your line through regularly scheduled inspection and monitoring. Our team will indicate areas prime for performance enhancing upgrades so you can stay ahead.

Don’t get left behind.

More than 23.5% of packagers have already implemented preventative maintenance to increase personnel capacity in their plant. You should too.
